

## **INFORMATION ON OILED OR INJURED BIRDS IN ALABAMA**

If you find oiled or injured birds, do not remove them from their habitat. Rather, document the location, time, number of animals, your name and the association with which you are affiliated.

Please do not attempt to decontaminate or rehabilitate wildlife at home. A toll-free number **866-557-1401** has been established to report oil or injured wildlife. BP has hired Tri-State Rescue to coordinate the wildlife rehabilitation efforts and they are working with local governmental and non-governmental organizations to stage area rehabilitation locations and volunteers.

For information, please visit the incident website:  
<http://www.deepwaterhorizonresponse.com/go/site/2931>

To request volunteer information on the Gulf of Mexico Transocean Drilling Incident, call 1-866-448-5816.

Please Remember: Self-deployment of non-trained volunteers and spectators will potentially hinder rescue and recovery efforts.
